

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

Says

Build empathy

What have we heard them say?

A vehicle management

system is a term that

forward

thinking useage and

tracking of all fleet

movements.

create and manage

vehicle records to

optimize the usage

of your trucks and

trailers that carry

inventories to stores

encompasses smart,

What can we magine them saying?

The information you add here should be representative of the observations and research you've done about your users.

Depending on your

company insurance

policy implementing a

VMS may also have a

beneficial effect on your

premium "lockout" style

badge scan-ins reduce

the temptation for theft

and outside vandalism

To track the

vehicles that

carry goods out

of a warehouse

assign them to

that warehouse.

Thinks

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

The VMS is an application for the automotive industry. It supports in the area of sales & services, the bussiness processes that you requires as vehicle importer when dealing with your orginal equipment manufacturers and your dealers in new and used vehicle sales.

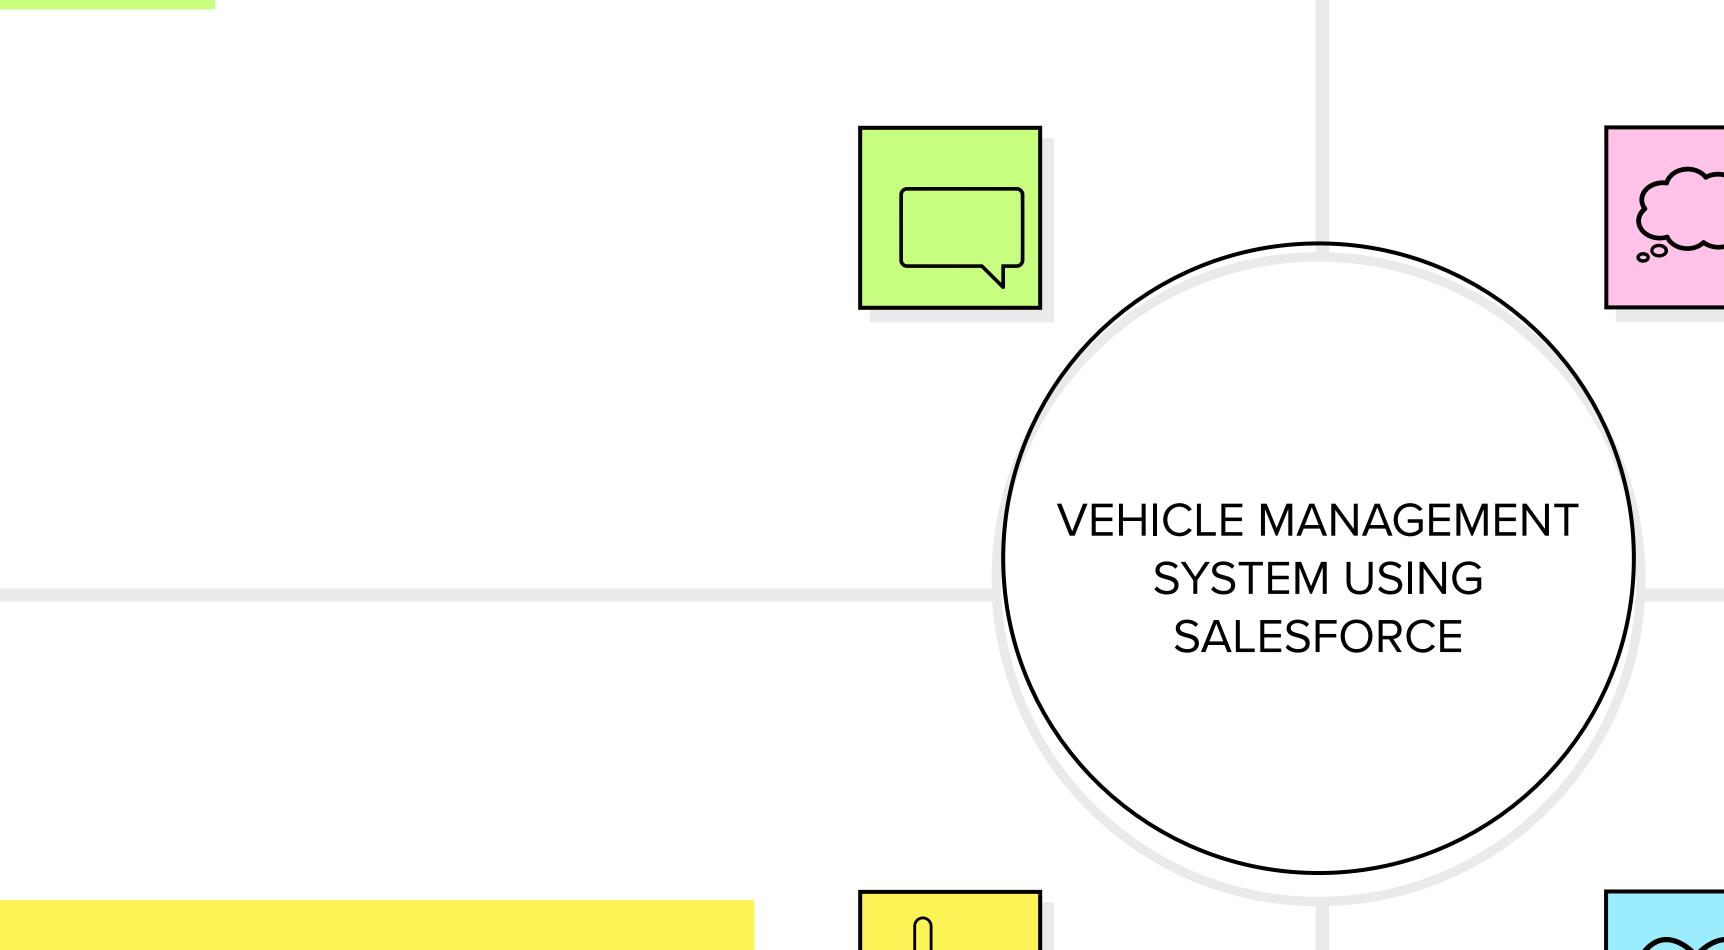

As people were hardwired with thoughts and feelings.Being aware of our thoughts and feelings are key to managingmental wellbeing.The amount and range of the thoughts and feelings we experience can make it difficult to understand how they may be impacting our daily lives.

npacting our daily lives.

Feels

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?

while many people think anxiety immwdiatly leads to feelings of anger, it usually leads to frustration first. if not properly managed ,anxiety may make an individual frustrated about their circumstances or the people involed.

Road plays an important role in transporting passengers and long distances. It suitable for, short medium and long distance service.

The indian railway system is the main lifeline of the country's domestic transport. Railways contribute to ecomics growth by meeting the demand for very high volumes of passenger and freight traffic. It is also considered as the backbone of the indian land transport system.

Does

What behavior have we observed? What can we imagine them doing?
